About Agility

Agility is a primary logistics provider to some of the region's largest Oil & Gas development projects. We also provide specialized logistics to major players in the agriculture, chemicals, defense and healthcare sectors. Our reputation is equally strong for providing seamless logistics support to major international events such as clearance and delivery for the Formula 1 Etihad Grand Prix race. Our extensive capabilities make us a logistics leader in Abu Dhabi and the Gulf region. We operate a 375,000 sqm logistics park that includes 200,000 sqm open yard storage space in the industrial heart of Abu Dhabi, 17,572 sqm of ambient & temperature controlled warehousing and a fleet of trucks for overland transport of containerized, non-containerized, heavyweight and oversized cargo.

Services

- Freight forwarding (air, ocean, road)
- Warehousing & distribution, Open Yard Storage
- Cross-border trucking
- Customs clearance
- Project logistics
- Chemical logistics
- Fairs & events logistics
- Records Management (RMS)

Customer Examples

Building chemicals mega-hubs in China

Agility designed and built a manufacturing and logistics hub in Shanghai for a leading provider of plastics solutions. The 66,000-sqm hub is designed to distribute up to 600,000 tons of plastic polymers imported from the Middle East. Agility designed and owns the hub, which was built to manage operations and distribution for our customer's clients in Asia over the coming decade. Agility is the exclusive logistics partner for a China mega-hub under development by a leading German consumer brand company. Agility is providing inbound logistics, warehousing of raw material and finished goods, production supply and clearance, and outbound logistics. The new hub will allow the customer to streamline manufacturing in China and position it for growth over the next decade.

Innovative logistics solution solves university's grading dilemma

One of the world's oldest and most prestigious universities with an international campus in Abu Dhabi and a strong reputation for academic excellence was looking for a service provider capable of streamlining its operations by reducing examination grading timelines. The university's traditional process required examination papers submitted by Abu Dhabi students to be delivered by courier to the main university overseas for grading and then returned to Abu Dhabi for dissemination. The transit times for the grading process sometimes took up to four weeks and posed severe challenges for students and professors and hampered the ensuing semester's registration process. To address these challenges, Agility developed an Examination Management System for the university by developing an Examination Management System that eliminated the need to send the examination papers physically overseas. Instead, professors overseas now simply log into the online EMS to grade Abu Dhabi students' examination papers. Agility's EMS permits the administration team in Abu Dhabi to have full visibility to the grading process undertaken abroad. This two-way logistics solution by Agility slashed the grading process from four weeks to just 72 hours. Now, students receive their grades earlier, giving them more time for registration and ensure availability.

Making the perfect match with a world-class tourism developer

Not many companies have the scope to develop some of the world's most prestigious tourism projects. Likewise, not many logistics providers have the resources to deliver the seamless, integrated support and specialty services required to make grand events and prominent exhibitions a success. The perfect match was made when a master developer of major tourism destinations in Abu Dhabi, UAE, engaged Agility. The developer's search for a world-class logistics partner led by Agility's customized solution that includes a dedicated team of customer service representatives, packers, movers, and forklift operators to handle the highly specialized models needed to stage events and tourism attractions. As the principle logistics service provider, Agility handles the storage, transportation, assembly and disassembly of architectural models, freight forwarding, customs clearance for the tourism promoter's wide range of exhibitions and events hosted in UAE. Other services from Agility include office relocation, loading, off-loading, kits and props, and installation of furniture and other appliances.
