THE 180-05, 2010, TO HER 2016 NEW ORLESS

IN-DEPTH

Start-upsize the embryos of tomorrow's business ecosystem. They give us hope for the future while laying the foundation for growth. In the 1990s, India had the likes of Bharti Airtel, Axis Bank and, of course, infosys for inspiration. In an earlier en, there was Relance and Nirma, which set the gold standard for entrepreneurship. Now, as we stand bang in the centre of a new digital evolution, Mitt seeks to find the potential superstars of the future. Our objective was simple to identify the constituents of a Mint 40 stock index in 2030. The choice of companies will be obvious in some cases, distantable in others, but there can be no arguing that these firms represent the zergeist of this new age of indian business. Over the next few months, Mint will profile these 40 companies, across industries and segments.

# Ecom Express

A dinner table conversation between four friends in their late 40s led to the formation of the e-commerce-specific logistics firm. After its initial success, the firm now looks to embark on the next phase of growth with a fresh round of fundraising, seven new warehouses over the next two years and deliveries for global e-commerce companies in India.
